F. IN CLOSING

Secretary of Labor Willard Wirtz, in urging that the goal of education should be "self-sufficiency," made the following statement which is of interest to all in the business of educating the nation's youth:

..."We use to think that we did our duty by providing 12 years of free education, and our thinking has been that anybody who doesn't use that is making a mistake--it is his fault, it is too bad, and our responsibility ends with supplying that opportunity.

In the past, lack of education was not an overwhelming handicap, but today these people without a high school education are just not going to have jobs."

Very truly yours,

E. B. Evans
President
